Best solution for a Beautiful & Healthy Smile

The Dental Rebuilder

- ❖ The potassium ions from potassium nitrate move into the holes in dentin to calm the nerves and soothe hypersensitivity
- ❖ Helps reform a protective layer over the exposed dentin to help prevent tooth sensitivity.
- ❖ Protects tooth enamel from bacteria that causes dental caries (Cavities).
- ❖ Helps in the formation of fluorapatite resulting in formation of enamel that resists bacterial degradation better than enamel containing no fluoride.

Mometasone Furoate

This medication is used to treat skin conditions such as eczema, psoriasis, allergies and rash. Mometasone decreases swelling (inflammation), itching, and redness.

Tretinoin

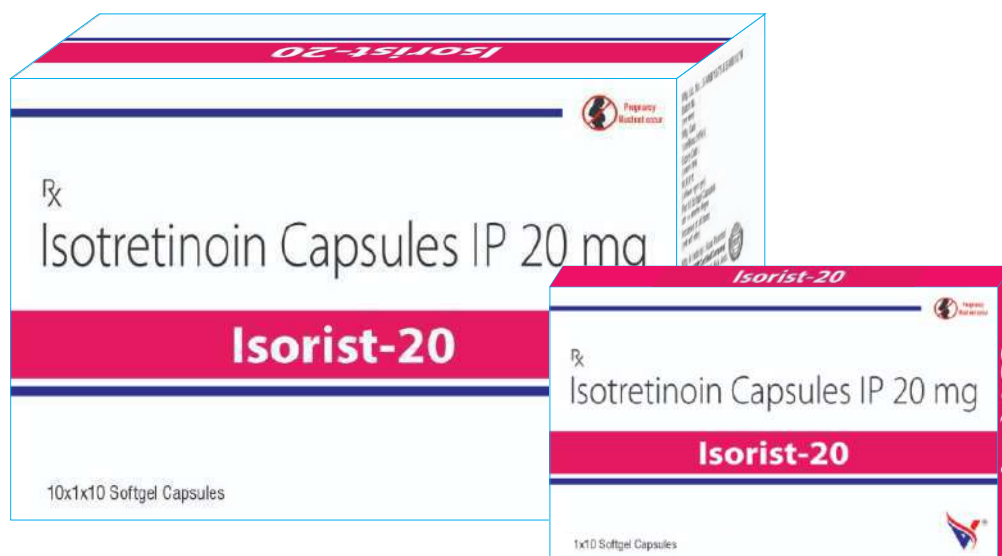

Tretinoin is used to treat acne or other skin diseases as determined by your doctor. It works partly by keeping skin pores clear. One of the tretinoin creams is used to treat fine wrinkles, dark spots, or rough skin on the face caused by the damaging rays of the sun.

Hydroquinone

Hydroquinone cream is the standard depigmentation or skin lightening agent. Clinically it is used to treat areas of dyschromia, such as in melasma, chloasma, solar lentigines, freckles, and post-inflammatory hyperpigmentation.
